SUMMARY

Software Engineering student at the University of Karachi with hands-on frontend experience across React, Next.js, Angular, and TypeScript. Shipped Attendify, a full-stack attendance management system, alongside independent projects spanning e-commerce, a RAG-based AI chatbot, and an encrypted authentication system. Focused on translating design systems into performant, accessible, production-ready UI.

EDUCATION

BS Software Engineering

University of Karachi

2026 – 2029 (Current)

Intermediate — Pre-Engineering (Grade: A)

St. Lawrence's Govt. Girls Degree College, Karachi

2024

Matriculation — Science (Grade: A+)

Sir Syed Children's Academy, Karachi

2022

SKILLS

Languages	JavaScript, TypeScript, Python, HTML, CSS
Frontend	React, Next.js, Angular, Tailwind CSS
Backend	Node.js, Nest.js, FastAPI
Databases	MongoDB, PostgreSQL
Tools & Practices	Git, GitHub, REST API integration, Figma-to-code, cross-team collaboration

WORK EXPERIENCE

Frontend Developer — ThreatCure

June 2025 – December 2025

- Designed and built the frontend for the ShieldOps platform in Angular, delivering a clean, intuitive interface aligned with modern UI standards.
- Built and maintained responsive UI components in Angular and Tailwind CSS, keeping interfaces consistent across the ThreatCure platform.
- Integrated REST APIs with the backend team and resolved UI bugs, keeping feature releases on schedule.
- Refactored existing components for performance and accessibility, improving maintainability across the codebase.

PROJECTS

Attendify — Attendance Management System [Live App](#)

Designed and built Attendify, a full-stack attendance management system in Next.js featuring geofence-aware clock-ins, shift and leave orchestration, role-based admin controls — giving teams real-time attendance visibility in place of manual tracking.

Elevate by Nike (Nike Clone) [Live App](#)

Converted Figma designs into a responsive e-commerce application in Next.js and Tailwind CSS, implementing dynamic product rendering, cart functionality, and headless CMS integration.

Physical AI and Humanoid Robotics [Live App](#)

Built a RAG-powered chatbot platform that delivers context-aware answers on robotics and AI topics by combining retrieval with generation.

Secure Data Encryption System [Live App](#)

Engineered a secure web application using Fernet encryption and hashed passkey authentication to protect sensitive user data end-to-end.

Todo Full-Stack Web Application [Live App](#)

Developed a full-stack task management app with AI-assisted task suggestions, authentication, and complete CRUD functionality to streamline everyday productivity workflows.
